Objective

Data Science student proficient in Python, SQL, and Machine Learning, with a strong focus on automation and data visualization. Demonstrated success through projects and internships, eager to apply analytical and programming skills in Python Developer or Data Science roles. Possesses a solid technical foundation and problem-solving ability to deliver impactful solutions.

Skills

Programming: Python, Java

Data Structures & Algorithms: Arrays, Strings, Linked Lists, Stacks, Queues, Trees, Graphs, Recursion, Dynamic Programming

Databases: SQL, MySQL, MongoDB

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI

Web Development: HTML, CSS, JavaScript, Node.js, React.js, Flask, Django, PHP

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code

Education

B.Tech in Data Science, Aditya Engineering College, Surampalem 08/2022 – 05/2026 (Expected)

CGPA: 7.53 / 10

Intermediate (MPC), VIT Junior College, Narasaraopet 06/2020 – 05/2022

Percentage: 94.5%

Class X (SSC), ZP High School, Velpur 06/2019 – 05/2020

Marks: 93.67%

Experience

Data Science Intern, Skill Dzure 06/2024 – 07/2024

- Built predictive machine learning models using Python and SQL, improving prediction accuracy by 12%.
- Developed dashboards and visualizations, reducing analysis time by 20%.
- Automated data preprocessing and reporting, saving over 10 hours weekly.

Content Writer, GeeksforGeeks 03/2024 – 09/2024

- Authored 10+ technical articles on Python, SQL, and algorithms, achieving over 3000 views.
- Guided 200+ learners through step-by-step coding tutorials to enhance problem-solving skills.
- Provided practical examples to simplify Data Structures & Algorithms concepts.

Projects

AI Voice Assistant (Python) [GitHub Link](#)

- Built a desktop voice assistant using Python, SpeechRecognition, and the OpenAI API.
- Implemented voice-based web search, email automation, and question-answer interactions.

Expense Tracker (Web Development) [GitHub Link](#)

- Developed a responsive expense tracking web application using HTML, CSS, and JavaScript.
- Enabled users to add, edit, and delete expenses with real-time balance and category-wise tracking.
- Implemented dynamic calculations and interactive UI to improve financial tracking and user experience.

Password Generator (Web Development) [GitHub Link](#)

- Designed a web-based password generator using HTML, CSS, and JavaScript to create secure random passwords.
- Added customization options for password length and character types, enhancing user control and security.

Certifications

Python: NPTEL, Guvi, HackerRank, LeetCode

SQL: LeetCode

Machine Learning: Coursera / Kaggle

Data Science Internship: Skill Dzure (2024)

Achievements

- Published 10+ technical articles on GeeksforGeeks, garnering over 3000 views.
- Solved 500+ coding problems across LeetCode, GeeksforGeeks, and CodeChef.
- Participated in multiple hackathons and coding competitions on Unstop.
